

Fulton County

Department of Solid Waste

The designation of these two new categories is the latest innovation at the Solid Waste Department, which offers a variety of services, including:

- Landfill with an estimated 60 plus years of site life remaining;
- Curbside Recycling for 85% of residents and drop off recycling for the remaining 15%;
- Business Recycling Program;
- Public Event Recycling Program;
- Annual Household Hazardous Waste Drop-Off;
- Latex Paint Exchange;
- Collection and recycling of vehicle batteries, waste motor oil, tires, bulk metal and textiles;
- Permanent electronics & TV, fluorescent bulb and rechargeable battery drop-off;
- Transfer Stations;
- County Demolition Team;
- Municipal Clean-Up Programs.

Program

Fulton County
Dept. of Solid Waste
Johnstown, NY

*Qualifies for LEED certification
on demolition recycling*

Phone: 518-736-5501

Clean C&D

Construction & Demolition

Debris

- Concrete (no metal)
- Asphalt pavement
- Bricks
- Soil
- Rocks

Cannot be Mixed with Clean Wood

Clean Wood *

- Tree parts
- Brush
- Pallets
- Lumber - No paint
(max length 8 ft.)

Cannot be Mixed with Clean C & D

***NOT ACCEPTED AS CLEAN WOOD:**
Wood treated with paint, adhesive, lacquer or other chemicals. No Plywood.

These special non-residential disposal categories for construction and demolition debris, as well as clean wood products, was established by the Fulton County Dept. of Solid Waste in April of 2010. It provides an alternate disposal method to landfilling - and these new categories will qualify for LEED certification calling for recycling.

CATEGORIES CANNOT BE MIXED

Construction & Demolition Debris will be crushed and used as alternate daily cover or as road base.

Clean Wood Products will be processed and ground in the department's tub grinder. The finished material will be used as mulch or compost.

Call 518-736-5501 for details

Rates

In-County \$10/ton
Out-of-County \$25/ton

Leadership in Energy and Environmental Design (LEED) is an internationally recognized green building certification system, providing third-party verification that a building or community was designed and built using strategies aimed at improving performance across all the metrics that matter most: energy savings, water efficiency, CO2 emissions reduction, improved indoor environmental quality, and stewardship of resources and sensitivity to their impacts.

Developed by the U.S. Green Building Council (USGBC), LEED provides building owners and operators a concise framework for identifying and implementing practical and measurable green building design, construction, operations and maintenance solutions.

LEED is flexible enough to apply to all building types – commercial as well as residential. It works throughout the building lifecycle – design and construction, operations and maintenance, tenant fitout, and significant retrofit. And LEED for Neighborhood Development extends the benefits of LEED beyond the building footprint into the neighborhood it serves.
